PREFORMED THERMOPLASTIC ROAD MARKING

## PREFORMED THERMOPLASTIC ROAD MARKING...

### COMPANY

After more than 20 years of experience in developing, manufacturing and worldwide distribution of preformed thermoplastic road markings a brand new factory was set up in Meerane, Saxony.

Combining state-of-the-art production technology with high performance raw materials, PrefaTherm preformed products meet highest standards in quality of product and service.

Today IMS as an only German independent manufacturer of preformed thermoplastic road markings has been supplying PrefaTherm branded products "made in Germany" to industry, trade and contractors worldwide.

### WIDE PRODUCT RANGE

Lines, arrows, letters, numbers and pictograms in those places, where shortest application time and highest product performance are required. Standard and oversized colored traffic signs and symbols for more traffic safety and information.

Customized corporate logos and signs to highlight private or industrial properties.

Playground markings for easy and creative learning or simply to brighten public playgrounds and schoolyards.

...and many other fields of application.

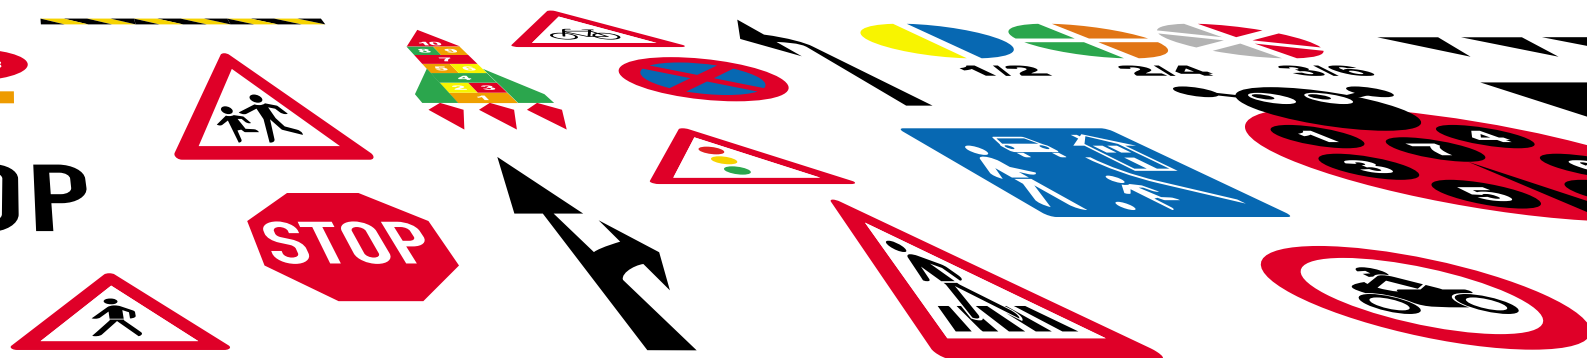

**We are anxious for your ideas!**

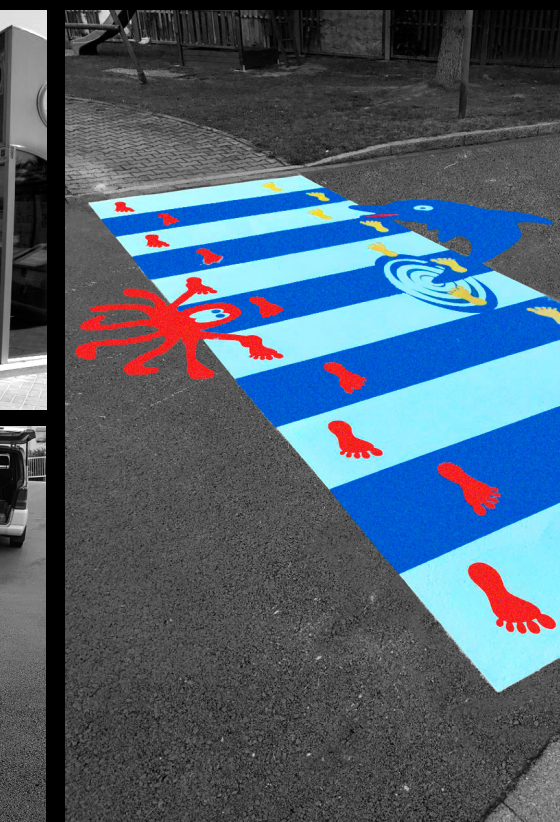

PrefaTherm standard RAL colours (other colors according to RAL Classic and RAL Design System on request).

...WITHOUT LIMITS
